

## Laboratory Technician Position at The College of William and Mary

The polarized  $^3\text{He}$  target lab at The College of William and Mary in Williamsburg, VA is looking to hire a full-time laboratory technician. The successful candidate would be responsible for the daily operation of the lab including preparation and monitoring of experiments, design, construction and repair of laboratory equipment, ordering supplies and occasional supervision of research students. This position offers an excellent opportunity to learn a large number of useful laboratory skills and techniques including electronics, lasers, glassblowing, cryogenics, vacuum systems and computer programming. Candidates must have a bachelor's or higher degree in the physical sciences or relevant research experience. Candidate must be reliable, responsible and must have careful attention to detail. Salary is \$25-30k depending on experience and the position includes full health and retirement benefits. Interested candidates should contact Dr. Todd Averett by email at [tdaver@wm.edu](mailto:tdaver@wm.edu). Information about this lab and Averett's research may be found at <http://www.physics.wm.edu/~averett/home.html>. William and Mary is an equal opportunity employer.
